FAITH HEALER

by Brian Friel

This play, written in 1979 provides more evidence of Friel's stature as one of the most significant playwrights of the second half of the twentieth century.

Three characters engage the audience with their different memories of the most crucial events and situations in their lives together. They reveal the beliefs which they hold, the illusions which sustain them, and the feelings which they hold about the other characters. Friel's view of his characters is clear-eyed and compassionate, and the result, always moving, sometimes humorous, always thought provoking, invites the audience to question the truth of what we see and believe.
